

Job Title: Research Assistant or Postdoctoral Research Associate

Department: Division of Life Science

Duration: 1 year, renewable

Job description:

We are seeking motivated Research Assistant or Postdoctoral Research Associate to support research in Dr. Yusong Guo's laboratory at the Hong Kong University of Science and Technology. Our research is focused on investigating molecular mechanisms that regulate trafficking of signaling receptors in mammalian cells. We have several exciting research projects that will utilize state-of-the-art biochemical and imaging techniques to analyze intracellular vesicular trafficking. The appointee will have his own research project.

Required qualifications:

Applicants for RA should have a master's or bachelor's degree in biology, biochemistry or a related field. Applicants for the postdoctoral research associate position should have a PhD degree in biology, biochemistry or a related field. They should have strong motivations in performing scientific research and also solid training in basic molecular and cellular biology laboratory techniques. Excellent written and verbal communication skills and an ability to succeed in a teamwork-oriented environment are required. Knowledge in generating stable cell lines is a plus.

A competitive starting salary and fringe benefits including annual leave, medical and dental benefits will be provided.

How to apply:

To apply for this position, a cover letter indicating current research and future research interests and curriculum vitae should be sent to Dr. Yusong Guo, Division of Life Science, The Hong Kong University of Science and Technology, Clear Water Bay, Kowloon, Hong Kong (email: guoyusong@ust.hk). Review of applications will start immediately and will continue until the position is filled. We thank applicants for their interest, but advise that only shortlisted candidates will be notified of the result of the application.
