

Job Title: Research Assistant

Department: Division of Life Science

Duration: 1 year, renewable

Job description:

We are seeking motivated individuals to support research in Dr. Yusong Guo's laboratory at the Hong Kong University of Science and Technology. Our research is focusing on investigating molecular mechanisms that regulate trafficking of signaling receptors in mammalian cells. The appointee will assist in ongoing research activities, train junior laboratory personnel and maintain communal equipment.

Required qualifications:

Applicants should have a master's or bachelor's degree in biology, biochemistry or a related field. They should have strong training in basic molecular and cellular biology laboratory techniques. Excellent written and verbal communication skills and an ability to succeed in a teamwork-oriented environment are required.

Starting salary will be commensurate with qualifications and experience. Fringe benefits including annual leave, medical and dental benefits will be provided.

How to apply:

To apply for this position, a cover letter indicating current research and future research interests and curriculum vitae should be sent to Dr. Yusong Guo, Division of Life Science, The Hong Kong University of Science and Technology, Clear Water Bay, Kowloon, Hong Kong (email: guoyusong@ust.hk). Review of applications will start immediately and will continue until the position is filled. We thank applicants for their interest, but advise that only shortlisted candidates will be notified of the result of the application.
